Ithaca™ Task Chair

Summary

Ithaca task seating has a mid-market price.

Ithaca has high comfort due to thick, yet supportive, cushioning and a great free-floating back action.

Key Customer Phrases

Mid-market price

Thick, yet supportive, seat cushioning.

High-end comfort.

Very pleasing design.

Why Ithaca?

Customers are demanding more product for less money.

More features, more comfort, better design . . . and lower price.

More Features

Ithaca uses a true synchrotilt mechanism, as found on the majority of high-end ergonomic chairs.

The seat and back are “synchronized” - moving in a 2 to 1 relationship. This is recognized as the most comfortable means of chair articulation.

Ithaca has back height adjustment. The range is 3”.

Ithaca has a 3-position back lock.

Ithaca has a tilt tension adjustment.

Ithaca has height and width adjustable arms.

More Comfort

What’s the first thing customers do when they sit in Ithaca?

They smile.

They smile because of the thick, yet supportive, seat cushion. (No bottoming-out, as with many competitive, thick cushioned task chairs.)

Ithaca’s seat cushion is unlike anything your customers have ever experienced. It is a unique foam formulation that is used extensively in Europe, but rarely in the U.S.

When customers relax into Ithaca they experience the smooth, responsive back flex.

Thick, supportive seat and smooth, responsive back flex. The formula for “Comfort”.

Better Design

Customers think of value-priced chairs as having little or no design. Non-descript. Boring. "Egg-shaped."

Not Ithaca.

Ithaca presents a gently radiused, flowing back design which pleases the eye, just as the thick-cushioned seat pleases the body.
