

Ithaca[®] Task Seating

flowing design | extraordinary comfort | surprising price

Ithaca is available as a task chair, task stool, or guest chair. Back panel is poly or upholstered. Multi-position back lock and seat-depth adjustability are standard on task chair and stool.

Ithaca® Task Seating

Ithaca offers extraordinary comfort for less money.

Answering the demand to get more for less, Ithaca has better design, more features, more comfort ... and lower price.

The gently radiused back design results in a clean, smooth style. The seat articulates with true synchrotilt, moving with a free-floating back action for a responsive, comfortable sit. Ithaca is fully featured with adjustable seat, back, and arms so it adapts to anyone.

Ultra-cushioned seat is made with a highly resilient foam that creates a very soft, yet supportive sit. Optional Soft Knit upholstery is 3-dimensional and woven specifically for the Ithaca seat. The result ... no foam compression, which means an even softer sit. A memory foam seat option is also available.

Arm adjustment (adjustable T-arm and adjustable 360° pivot arm) – adjusts 3" in height and width.

Seat-depth adjustment slides 2.5" in depth and adds 2" in height (not available on guest chair)

Back-height adjustment (not available on guest chair) – adjusts 3" in height (19.5 to 22.5" above seat)

Synchrotilt – free-floating back action moves in a 2 to 1 relationship – the most comfortable means of chair articulation.

Specifications

Task Chair
Armless or with arms: 26W 37-45H
Seat: 20.5W 18-20.5D 17.75-22.25H
