

Ithaca[®] Ultra

Task Seating

enhanced comfort | cool mesh design | exceptional price

Ithaca Ultra is available in two task chair versions – high-back or mid-back – as a task stool and as a guest chair. Seat-depth adjustability is standard on task chairs and stool. The mid-back task chair also has standard back-height adjustability.

Ithaca® Ultra Task Seating

Ithaca Ultra offers the perfect combination of comfort and value. A conforming mesh back with a wonderfully “cushy” yet supportive seat – all at an extraordinary price.

The mesh back has sufficient “give” to conform to the unique curvature of your back, providing constant support. It also enables cooling ventilation for exceptional comfort.

The seat offers ultra-cushioning with a highly resilient foam formulation that creates a very soft sit. Optional Soft Knit upholstery is 3-dimensional and is woven specifically for the Ithaca Ultra seat. The result ... no foam compression, which means an even softer sit. A memory foam seat option is also available.

Arm-width adjustment (adjustable T-arm and adjustable 4D arm) – adjust 3" in width.

Seat-depth adjustment (not available on guest chair) – seat slider adjusts 2.5" in depth.

Back-height adjustment (mid-back only) – adjusts 3" in height

Optional headrest (high-back only) – black leather headrest adjusts for height and angle.
