Volition® is a freestanding desk system. Several combinations of shapes and sizes are offered to allow for an almost infinite amount of layouts. Shapes range from rectangles to piano shapes to various conference ends. Since the system is freestanding it allows for easy changes to meet the user's needs.

Volition was designed with power and data needs in mind. Power and data can be hidden above or below the desk to maintain the clean look of the end user's office. All desks have grommets. Wire troughs and cord dumps keep cables organized and out of the way. Stanchions that can support overhead units also house electrical and data receptacles.

Volition easily integrates with other systems. Brackets can be added to the desks to allow them to support the PowerWorks panel systems. Power from the panel system and Volition can be connected when the systems are integrated. This makes future changes and additions easier to manage.

Volition offers several options on almost every desk. All desks offer a standard modesty panel beam but an optional panel can be added that gives the desk a full modesty configuration. Privacy screens are available for sit-down privacy or stand-up privacy. Screens can be ordered in a variety of materials to include fabrics and translucent plastic. Tool rails provide for paper and accessory management. Workstation end panels can be ordered in shorter lengths to allow for increased leg clearance.

Volition is offered in numerous painted colors, and a wide array of laminate selections are available.

Special Services

Specifications and prices subject to change without prior notice.

ANSI/BIFMA

Volition® meets or exceeds the required ANSI/BIFMA X5.5-2008 desk systems standard.

Quality

All Volition desking components shall originate from ISO 9000, ISO 9001, or ISO 9002 registered facilities.

UL Listed

Volition desks are listed to applicable UL standards and requirements by Underwriters Laboratories Inc. Two of the standards used to evaluate Volition desks are UL 1286 Office Furnishing and UL 723 Standard Test for Surface Burning Characteristics of Building Materials.

Basic Worksurfaces

Worksurfaces shall define the shape of the workstation and provide support for overhead storage, electrical components, and privacy screens. Worksurfaces shall be designed to integrate function and ergonomics to provide solutions that meet ANSI/HFS-100-1998 and ADA user requirements.

Rectangular Worksurfaces

Worksurface tops shall be 1-1/8" high density particleboard with .03 or .04 high pressure laminate surface and .02 to .04 phenolic backing sheet. Top shall be available with a flat 2mm PVC edge in a choice of multiple colors or a 3/8" wood edge. Worksurfaces shall be available in 24", 30", 36", 42", 48", 54", 60", 66" and 72" widths and 24" and 30" depths. They shall be available in a 29" height.

Basic Rectangular worksurfaces shall include 2 triangular worksurface grommets, located in the back corners of each worksurface. 66" and 72" worksurfaces shall have 3 triangular worksurface grommets, two in the corners and one located near the back center of the desk. Grommets shall be available in BL, GR, LG, SA, TR or WG. The legs shall have (2) 3.27" x 2.27" wire management ports located in the top outside edge of each back corner. Worksurface and leg grommets will be molded from polycarbonate.

Leg Assembly - Each leg assembly consists of welded and assembled components which come together to form the full leg assembly. The leg assembly is attached to the underside of the worksurfaces from above. A metal leg cover can be removed from the front of the leg to gain entry to the interior of the leg. Within the leg, there is a metal structural support that can be used to separate power and data running within the leg. A glide is attached to the bottom of the leg for up to 1-1/8" of adjustability. The desk leg - Formed of 18-gage steel, overall dimensions are 6.00" x 6.00" x 27.25".

Modesty Panel Beam - Formed of 18-gage steel, overall dimensions are 3.00" x 9.00" x length determined by size of worksurface. The modesty panel beam is attached to the underside of the worksurface and the leg assembly. The modesty panel beam allows basic cabling to be run along the width of the desk. Plastic worksurface spacers that provide a slight stand off distance between the worksurface and modesty panel beam shall snap into place to aid installation.

Data Modesty Panel Bracket - A steel bracket shall be available that will attach to the underside of the modesty panel beam near the worksurface. It will have a 1.38" x 2.70" opening to accept several different manufacturers' TIA/EIA standard data faceplates.

Lower Modesty Panel - Optional. Formed of 18-gage steel, overall dimensions are 1.00" x 18.00" x length determined by size of worksurface. The lower modesty panel is attached to the leg assembly and will complete the full enclosure of the back of the desk.

Finish for all metal parts shall be made available in many standard enamel colors.

End Panel Assembly - Each end panel consists of welded and assembled components which come together to form the full end panel assembly. The end panel is formed of 18-gage steel and has a honeycomb core for strength and noise reduction. Overall dimensions are 1.25" x 27.00" x depth determined by worksurface size or configuration. The depth is available in three sizes based on the depth of the worksurface (24" or 30") and whether or not a transitional or full end panel configuration is desired. The end panel assembly is attached to the underside of the worksurface and the leg assembly. A glide is attached to the bottom of the end panel for up to 1-1/8" adjustability.

Rectangular Reduction Worksurface

Rectangular reduction worksurfaces shall have the same basic construction as the rectangular worksurfaces. These worksurfaces shall have a depth of 24" on one end and 30" on the opposite end. The reduction shall be accomplished with two gently curving (12" radius) arcs that change direction halfway into the width of the worksurface. Widths of 24" to 72" in 6" increments will be available.

Executive Worksurface

Executive worksurfaces shall have the same basic construction as the rectangular worksurfaces. These worksurfaces shall have a depth of 24" or 30" with a radius edge on the back of the worksurface. The radius edge shall extend a maximum of 6" beyond the normal depth. A right and left back corner grommet will be standard. Widths available will be 60", 66", and 72".

Corner Worksurface

Corner worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional leg assembly, modesty panel beam, and optional lower modesty panel. In freestanding applications, standard end panels must be used. If attached to another worksurface, transitional end panels may be ordered to replace standard end panels for the sides of the attachment on both worksurfaces. Transitional legs shall be available that allow additional clearance. The front working edge will have a 16" or 22" radius depending on the size of the worksurface. Depths of 24" and 30" and widths of 48" to 72" will be standard (54" width is not available). One side is always 48" (except for a 42"/42" desk.) Three grommets, one per corner, are standard. Whenever a width is 66" or 72", a grommet will be added approximately midway of that width.

P-Shaped and Piano Shaped Worksurfaces

P-shaped and piano shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional 4" support leg and standard modesty panel. The support leg shall be attached towards the rounded front end of the worksurface. The tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1-1/8" adjustable steel glide. In freestanding applications, standard end panels must be used. If attached to another worksurface, transitional end panels may be ordered to replace standard end panels for the sides of the attachment on both worksurfaces. The front working edge will have a 16" or 22" radius depending on the size of the worksurface. Depths of 60" and 72" and widths of 48" will be standard. Two grommets, one per corner, are standard.

D-Shaped Worksurface

D-shaped worksurfaces shall have the same basic construction as the rectangular worksurfaces with an additional 4" support leg and standard modesty panel. The support leg shall be attached towards the rounded front end of the worksurface. The tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1-1/8" adjustable steel glide. The width of the top shall be 24", 30", or 36". The depth shall be available in a range from 48" to 72".

Worksurface Wedge

The worksurface wedge shall have the same basic construction as the rectangular worksurfaces with the addition of 4 splice plates & 16 screws. The wedge shall be attached between two worksurfaces that form an L-shape. It shall be a right triangle measuring 12" x 12" x 17".

Round Add-On Worksurface

Round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in a diameter of 36" and 42". The 36" diameter round add-on will have a flat edge of 24", and the 42" round add-on will have a flat edge of 30". The single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1-1/8" adjustable steel glide. A pair of steel splice plates will be included to attach the round add-on to a worksurface.

1/2 Round Add-On Worksurface

1/2 round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They shall be available in a diameter of 48" and 60". The 48" diameter 1/2 round add-on will have one flat edge of 48", and the 60" round add-on will have one flat edge of 60". A single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1-1/8" adjustable steel glide. The 1/2 round add-on will be able to attach to a pair of 24" or 30" worksurface ends. A pair of steel splice plates will be included to attach the 1/2 round add-on to a pair of worksurfaces.

1/4 Round Add-On Worksurface

1/4 round add-on worksurfaces shall be available with the same edge treatments as the rectangular worksurfaces. They

shall be available in a radius of 24" and 30". A single tubular support leg will have a diameter of 4", be constructed of 14-gage steel, and have a 1-1/8" adjustable steel glide. The 1/4 round add-on will be able to bridge a pair of identical depth (24" or 30") 90° worksurface ends. It will also be able to be attached to an appropriate matching (24" or 30") edge of a single worksurface edge. A pair of steel splice plates will be included to attach the 1/4 round add-on to a pair of worksurfaces.

Relocatable Power Tap (RPT)

The RPT shall have duplex outlets and be mountable in the overhead stanchions or transaction countertop stanchion. Two RPTs may be mountable per stanchion. Cord lengths available for RPTs shall be available with a cord length of 36" or 96". RPTs will provide above worksurface height power via an installed 10-wire electrical system or through the use of building wall outlets.

10-Wire Electrical Distribution System

The 10-wire system is available in two configurations (6-2-2 and 4-4-2). The UL label is green for 6-2-2 and blue for 4-4-2 applications. These numbers refer to the quantity of hot - neutral - ground wires configured in each system. Both the 6-2-2 and 4-4-2 systems may be brought into the system from the ceiling, the wall or floor, through the use of top feeds and base feeds. Volition 10-wire electrical will be able to integrate with OEI's PowerWorks panel system with the addition of the appropriate connectors.

The 10-wire electrical distribution system will consist of a 10-wire harness, table to table connectors, and a 10-wire infeed kit. The 2.16" wide double sided, rigid 10-wire harness shall mount to the underside of the modesty panel beam and shall be available in widths to span the worksurface. The 30" to 66" wide worksurface harness kit shall accommodate (2) 15 amp duplex receptacles and the 72" wide worksurface harness kit shall accommodate up to (4) 15 amp duplex receptacles.

Receptacles shall be available to access up to 6 circuits within the harness and must be ordered separately.

Both 10-wire circuits are rated at 120 vAC @ 20 amps. All receptacles are rated at 15 amps. The specifics of each wiring configuration are detailed below.

Note: The two ten wire systems (4-4-2 and 6-2-2) cannot be mixed together. The wiring systems must be separate.

There are different receptacles for each system, and different connectors specific to each system. Keyed connectors will not allow the 2 systems to be mixed.

6-2-2 Configuration

The 6-2-2 configuration of the 10-wire system will have three "convenience" circuits (1, 2, & 3) which will each have their own hot wire, will share an oversized neutral wire, and will share the building ground wire. Circuits 4, 5, & 6 are "isolated ground" circuits that will each have their own hot wire, will share an oversized neutral wire, and will share an isolated ground wire.

The advantage of this system is that it will be able to have

6 circuits coming in via one top feed or base feed. This will cut down on the number of feed points on an installation. The number 4, 5, & 6 receptacles will be colored orange to designate that they are on the isolated ground, while the number 1, 2, & 3 receptacles come in the standard trim colors.

4-4-2 Configuration

The 4-4-2 configuration of the 10-wire system will have two "convenience circuits (1 & 2) which will each have their own hot wire, their own neutral wire, and will share the building ground wire. Circuits 3 & 4 are "isolated ground" which will each have their own hot wire, their own neutral wire, and will share an isolated ground wire.

The advantage of this system is that all of the circuits will have their own neutral wires, and has two circuits (3 & 4) that use an isolated ground. The number 3 & 4 receptacles will be colored orange to designate that they are on the isolated ground, while the number 1 & 2 receptacles come in the standard trim colors.

10-Wire Power Infeed Kit

The 10-wire power infeed kit shall provide power from fixed floor, or wall sources to the 10-wire harness. It shall include 6' of plastic covered flexible conduit. To connect the "hardwire" end of a 10-wire topfeed or basefeed to your building, use a 3/4" Romex connector on the conduit.

10-Wire Power Table to Table Connector

10-wire table to table connector shall consist of a sleeved flexible harness, which provides power connections from adjoining desks. The jumper shall have a length of 27".

Power Pole

The power pole body shall be made of extruded aluminum, 16-gage, overall dimensions are 1.73" x 3.43". It will have two cavities for physical power and data separation. Length of top feed harness is 12'. The power pole cover will be made of extruded aluminum, 16-gage; overall dimensions are 1.73" x 3.43" x height determined by ceiling. A plastic trim piece will cover the area where the pole intersects the ceiling.

Privacy Screens

Privacy screens shall be available to provide sit down or stand up privacy within the Volition workstation. Screens shall be 3/4" thick, 18-1/4" and 38" high, and available in widths to fit all worksurfaces. They shall be mountable to either the overhead supports (SBS), behind the worksurface (SBW), to the top of the worksurface (SOW), or with a combination of attaching to an overhead support and a worksurface top (SSO).

Privacy screens shall be designed for straight-line

applications. They shall include mounting brackets for attachment to the worksurface. Screens shall be available for straight applications in 24", 30", 36", 42", 48", 54", 60", 66", and 72" widths. The 66" and 72" widths shall consist of a pair of screens (1) 30" plus (1) 36" screen for 66" applications and (2) 36" screens with splice extrusions for 72" applications.

Screens may be used to serve 2 worksurfaces placed back to back. Privacy screens shall be useable on worksurfaces

with overhead storage units to close the opening between the worksurface and the bottom of the shelf. Corner screens shall include a corner light block channel. The light block channel will also serve to align and hold the back corner together. Screens shall be available in configurations to match the worksurface application, basic worksurface, or corner worksurface.

Privacy screens will consist of two different aluminum extrusion profiles, each assembled with die-cast corner connectors to create a rectangular frame. The frames will be either upholstered or painted, depending on option. Between the two assembled frames, different core materials can be inserted. The screen material shall be made of 1/2" or 3/4" thick tackable core light or a 10mm thick non-tackable translucent plastic. The frame shall be made of extruded aluminum that is .060" thick. Overall dimensions of the frame shall be 1.40" x length and height dependent on desk size and screen height. The bracket extrusion shall be made of extruded aluminum. Overall dimensions are dependent on screen option and height and desk size.

Overstorage Mounted Privacy Screen

Same construction as above with the exception of mounting bracket. The mounting brackets shall be formed of 16-gage steel with overall dimensions of .54" x .92" x 12.38".

Transaction Worksurface

Transaction worksurfaces shall be available in rectangular and corner configurations. The construction of the worksurface will be similar to a standard worksurface except for shape and overall dimensions.

The transaction panel shall be formed of 18-gage steel and attach to the underside of the transaction worksurface. Depths for rectangular and corner shapes shall be 16". Overall rectangular widths available shall be from 24" to 72" in 6" increments. Overall corner transaction sizes available shall be 42" x 42", 48" x 60", 48" x 66", 48" x 72", 48" x 48", 60" x 48", 66" x 48", and 72" x 48".

Transaction Worksurface Support - Formed of 16-gage steel. Overall dimensions are 6.00" x 6.00" x height determined by height of transaction worksurface. Support Cover - R/C (QMFZ2), rated 94HB minimum or formed of 20-gage steel. Overall dimensions are 6.62" x 11.38".

Overhead Support Stanchion

The overhead support stanchions shall be formed of 16-gage steel, overall dimensions will be 6.00" x 6.00" x 19.50". A reinforcement plate (16-gage steel) inside the support shall have 4 cutouts that can accommodate either commercially available data plates or Removable Power Taps (RPT).

Overhead support stanchion covers shall be standard.

The covers shall be made of extruded plastic and available in 5 standard trim colors. They will be hinged to allow access to the inside of the overhead support stanchions. A flexible rubber trim piece shall allow power or data cables to be run from the worksurface into the overhead support stanchions.

Overhead Storage

Volition shall offer 2 styles of overhead storage units for use with any worksurface. The two styles are the Universal overhead and the Venus overhead. Overheads for basic rectangular worksurfaces shall attach through the grommets in the top of the worksurface. They shall have vertical wire channels that conceal the attachment and wires from the top of the shelf to the worksurface.

Shelf dividers made of powder coated steel shall be offered in 5 standard trim colors. The installation or removal of them shall be accomplished without the use of tools or fasteners.

All overheads (Universal or Venus) shall be able to be used on System XXI, Panel Mounted or Off Module Powerworks, or Volition, depending on brackets used.

Universal Overheads

Overhead cabinets shall be 34" high and shall have 18-1/2" clearance between the worksurface and the bottom of shelf. The universal overhead shall be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", and 72". The flipper door opening shall be 13" high. They shall be available with doors of painted steel, fabric, laminate, or veneer. Locks shall be randomly assigned or keyed per customer requests. All 72" overheads will consist of a pair of 36" overheads. All 66" overheads will consist of a 30" and 36" overhead combination.

Universal Overhead Regular Shelf

Product Offering - The product shall be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", and 72". The overall dimensions of the end panels shall be 16-1/2" x 15". The shelf depth shall be 15".

Construction - The end panels shall be constructed of 14-gage steel, with a powder coat finish. The end panels shall have self-locking mounting tabs formed into the back edge. The shelf shall be an 18-gage steel weldment with a powder coat finish. The front edge of the shelf shall be a PVC extrusion that also provides space for a concealed flush mount task light.

Universal Overhead Low Shelf

Product Offering - The product shall be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", and 72". The overall dimensions of the end panels shall be 9-1/4" x 15". The shelf depth shall be 15".

Construction - Same as a Universal overhead regular shelf unit.

Venus Overhead

The cabinet sides shall be constructed of 14-gage sheet steel, while the top, back, and shelf will be constructed out of 18-gage sheet steel. Venus overheads will be offered in widths of 24", 30", 36", 42", 48", 54", 60", 66", and 72". The top, sides, back, and shelf will be resistance welded so there are no visible weld marks on the class A surfaces (outside visible surfaces). The cabinet shall be painted in the standard desk colors. The upper door shall be comprised of extruded rigid PVC. The extruded rigid PVC will be available in the 5 standard trim colors along with translucent. The lower door shall be comprised of extruded aluminum, which shall be available

in the standard colors. A 10-gage hot rolled steel link arm connects the upper door and lower door. All 72" overheads will consist of one 72" shelf with a pair of 36" overhead doors. All 66" overheads will consist of one 66" shelf and a pair of 33" overhead doors.

Spring tension shall be used to assist in the opening and closing of the door. Applying pressure to the lower door opens both doors. Less than 5 pounds of force shall be needed to open both doors. The overhead door shall be able to be opened with a closed fist as well. The force and ease of opening shall make this overhead ADA compliant.

The shelf and back shall be slotted every two inches to allow for the use of shelf dividers. The underside of the shelf is also slotted with 1.5" x 1.5" slots to allow for electrical cords to run through the back.

METALLICS

Select Laminate Surface Textures (excluding for MARKERBOARD WHITE)

LAMINATE SURFACE TEXTURES

#01 HIGH GLOSS - PREMIUM
 A mirror sheen finish, which gives a smooth, brilliant appearance. Recommended for horizontal applications such as countertops and light-to medium commercial applications. Excellent for vertical application.

#11 LINEARITY - PREMIUM
 A directional texture running the length of the sheet, having a narrow, random, matte-gloss linear quality. It is complementary to linear woodgrains, and linear patterns and provides dimension and visual movement to solid colors. Recommended for horizontal and vertical application.

#28 GLOSS LINE - PREMIUM
 A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surface areas. Recommended for horizontal and vertical application.

#55 GLAZE - HD PREMIUM
 A layering of matte features over a glaze of semi-gloss, creates this timeworn effect. Recommended for horizontal and vertical application.

#07 TEXTURED GLOSS - PREMIUM
 A textured finish which reproduces the high sheen of waxed wood furniture. Recommended for horizontal and vertical application.

#19 LENO WEAVE* - PREMIUM
 NEW Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss mix. Recommended for horizontal and vertical application.

#35 MIRAGE - HD PREMIUM
 Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Recommended for horizontal and vertical application.

#57 ALIGNED OAK* - HD PREMIUM
 NEW Authentic realism is brought to the surface using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel of real wood. Recommended for horizontal and vertical application.

#12 SOFTGRAIN - PREMIUM
 A dense, woodgrain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. Recommended for horizontal and vertical application.

#21 SOFT SILK* - PREMIUM
 NEW A smooth, ultra-matte texture that leaves a soft-to-the-touch sensation coupled with a low sheen. Recommended for horizontal and vertical application.

#38 FINE VELVET TEXTURE - STANDARD
 A smooth textured finish with moderate reflective value. Recommended for horizontal and vertical application.

#60 MATTE - STANDARD
 Textured finish with a moderate reflective quality. Recommended for horizontal and vertical application.

#16 CASUAL RUSTIC - PREMIUM
 A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. Recommended for horizontal and vertical application.

#22 ANTIQUE - PREMIUM
 A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical application.

#52 QUARRY - PREMIUM
 Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical application.

#78 FINEGRAIN - PREMIUM
 This premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. Recommended for horizontal and vertical application.

* Not available in Textured Solids

AEON™ Finish features AEON™ Enhanced Performance Technology, providing 3x industry standard wear resistance, improved scratch, scuff and mar performance, versus comparable competitive finishes.

ANTIMICROBIAL PROTECTION is built into the laminate to protect the surface against damaging microbes. Antimicrobial agents protect the surface from the growth of mold and mildew that cause odors when used for countertops and work surfaces.

Executive Desk

- Consists of top, two legs, full modesty panel, and standard depth end panels
- Each leg has two cable access grommet locations
- Top has two cable access grommets above the legs
- Modesty panel allows for optional 10-wire electrical system
- “Guest” side of desk has 6” deep bowed overhang worksurface edge
- The dimensions in the Model No. reflect the size of the base unit, NOT the top
