GENERAL INFORMATION

Vini® is an active and accessible storage collection designed to augment systems offerings and provide more relevant and cost-effective workstations for applications within vertical markets.

The Vini® collection includes lateral files, freestanding, mobile and worksurface-supporting pedestals, double pedestals, credenzas, wardrobe tower cabinet units, wardrobe tower side-access bookcase units, overheads, underheads, and related accessories. Nominal and actual dimensions are listed with each item to the nearest 1/16".

All Vini storage models meet or exceed ANSI/BIFMA X5.9-2012 standards.

CONSTRUCTION AND STANDARD FEATURES

All Vini® storage units are constructed of steel. Box and file drawers feature smooth riding, ball-bearing slides. Box drawers feature a three-quarter travel. File drawers feature a full extension. Units feature ADA-compliant nickel-plated loop pulls.

Glides

Freestanding pedestals feature non-adjustable glides which allow units to match the height of mobile units. Credenzas feature 1-1/2" glides with 1" adjustment range. Worksurface-supporting pedestals, double pedestals, and wardrobe towers feature 2-1/2" glides with a 1" adjustment range.

Locks

Locks are standard on all units. The lock is a high security, single bit type. Units are standard with random keys in a range of 100 different numbers. Specific keying combinations are available at no additional charge. This information must be included with the order. Locks can be master keyed.

All locks have removable and interchangeable cores. This feature provides for onsite custom keying. Locks can be supplied with the cores installed or shipped separately. To order cores for field installation, specify "lock cores not installed" on order.

Order must specify total quantity of specific key-numbered locks.

Example: 30 Cores
3 keyed alike
10 keyed alike
17 keyed alike

Paint

All inside and outside shell and front surfaces are electrostatically powder coated. All interior drawer bodies are painted black. Colors are listed in the Color Addendum.

Lateral Files

Lateral files are offered with 12" drawers and receding doors, in three widths: 30", 36", and 42". Refer to pricelist for standard configurations. Uprights and top and bottom reinforcements are welded into rigid boxframe. Seamless back and top feature reinforced corners.

Optional laminate tops are available.

Lateral File Adjustable Glides

Lateral files are supplied with four adjustable glides. The glides can be adjusted from inside the cabinet using a 1/4" hex socket wrench, or from outside the cabinet using a 7/8" wrench. Standard glides provide 3/4" adjustment; longer glides are also available. Overall cabinet heights include the glide in its recessed position.

Pedestals

Mobile, freestanding and worksurface supporting units are offered in box/box/file and file/file drawer configurations. Mobile units are also available in a box/file configuration. Pedestals are shipped for front-to-back letter-sized filing. Pencil tray, if desired, is specified separately. Work-surface-supporting pedestals may be used to support worksurfaces in panel-wrapped applications. Cantilevers or other supports are not required at the end of a worksurface when specifying a worksurface-supporting pedestal. A panel-tie bracket is required when a worksurface-supporting pedestal replaces a return panel.

A counterbalance weight is included in file/mobile and freestanding units for stability.

A counterbalance weight may be required in worksurface supporting file/file pedestals depending on the desk configuration.

Optional laminate tops are available.

Laminate Tops - Pedestals/Laterals

Laminate tops feature a 1-1/8" thick high-density particleboard core with high-pressure laminate top and phenolic backing sheet. Total thickness of table top is 1-1/4". Selection of 74P Edge (2mm Polypropylene) or SE (Laminate Self Edge) is available. Laminate tops are installed with provided double-face tape to allow future removal without damage to cabinets.

Double-Wide Pedestals

Worksurface-supporting double wide pedestals are used to support worksurfaces in panel-wrapped applications. Units feature two 12" drawers with side-to-side hanging folder bars. Double wide pedestals may be specified at return conditions but not be specified in place of panel returns.

Credenzas

Each freestanding credenza features a single sliding door with lock that spans approximately half of the width of the credenza. Bottom shelf is sufficiently sized to hold binders. Top shelf is non-adjustable. Bottom of unit features adjustable glides.

Optional laminate tops are available.

Wardrobe Towers

Wardrobe towers are stand-alone storage units. Wardrobe/cabinet units feature a pedestal in file/file or box/box/file configuration, a full vertical height wardrobe with coat hook, and a storage cabinet with an adjustable shelf.

Wardrobe/side-access bookcase units feature a pedestal in file/file or box/box/file configuration, a full vertical height wardrobe with coat hook, and an open bookcase with one adjustable shelf. Pedestal aesthetic matches wardrobe pedestal.

The handedness of a wardrobe tower is determined by the location of the wardrobe unit. A right unit features the wardrobe on the right side of the unit.

Sliding Door Overhead and Underhead Storage

Overhead and underhead units each feature a single sliding door with lock. Door spans approximately half the width of the unit. Slide mechanism uses four wheeled rollers. Units are sufficiently sized to house upright standard binders. Underheads to be used only in conjunction with Legion Panel Systems.

Model Numbering System

Each character in the basic model number corresponds to a specific unit feature.

How to Build a Model Number
