

ITHACA® ULTRA Seating

The optional, plush molded foam headrest attachment adjusts for personalized comfort.

I t h a c a U l t r a H i g h - B a c k

Since its introduction, the Ithaca Seating Line has been providing the comfort and adjustability of premium seating without the premium price tag. The Ithaca Ultra gives this tradition a modern twist by adding a mesh back to the upholstered seat. Not only does this mesh give the chair a new look, it adds a new dimension in comfort—the unsurpassed breathability and support of a material that conforms perfectly to your body.

In the true spirit of a hybrid, the Ithaca Ultra High-Back has retained many of the features that made the original a hit, including the molded foam seat that provides all day support without fatigue. The seat height and depth controls continue to put an executive ergonomic experience within easy reach. For executive luxury, the fluid movement of the synchrotilt mechanism is unchanged as well.

Pivoting T-arms allow you to adjust the angle of the armrests a full 360°, in addition to the horizontal and vertical adjustment, guaranteeing a perfect fit.

Vertical and horizontally adjustable T-arms provide comfortable, ergonomic support without intruding into your seating area.

For the classic task chair look and feel, fixed loop arms of urethane can be specified.

The adjustable loop arm adds the customizable comfort of height and width adjustability to the classic look.

Ithaca Ultra Mid-Back/Stool

Because even an incredibly innovative design doesn't fit all, the Ithaca Ultra is available in multiple configurations. The Mid-Back task chair has the full range of seat adjustments and arm options of the high-back. It even goes one better by adding a feature-back height adjustability.

The Ithaca Ultra stool features the same seat height adjustability and synchronous mechanism as the task chairs. The addition of an oversized 5-star base and adjustable steel foot ring

provide increased stability and security at the stool height.

The Ithaca Ultra guest chair may rely upon its sturdy, steel sled base and subtle curves to attract attention, but that doesn't mean it is short on thoughtful features. The mesh back is height-adjustable, and the non-marring poly glides provide stability on a variety of floor surfaces. Even at its most basic, Ithaca Ultra is the smart choice in innovative design.

The back height of the task chair can easily be adjusted from a seated position by sliding it along its track.

Changes in seat depth are made possible by a lever conveniently located beneath the seat.

Locking the back and seat in any of several angles is as easy as pushing in the locking lever. To free-float, just pull it out.

A tilt tension knob means that every user can adjust the chair to respond to their reclining cues.
