

# Stainless Steel Products for Institutional Use

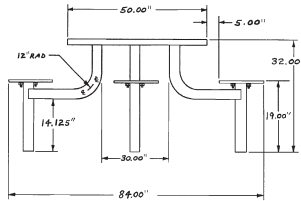

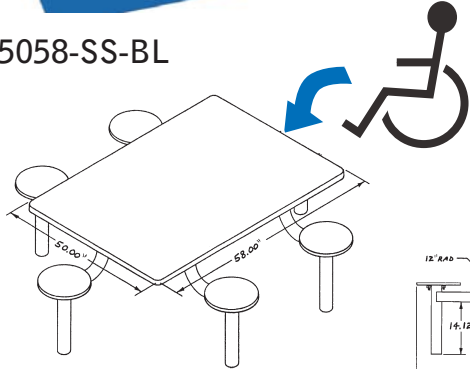

- Products developed for secure, institutional settings and,
- Products for the foodservice industry wherever the public is served.
- Stainless steel - the ultimate surface.

ISDT-5058-SS-BL

Designed for the correctional setting, this six station dining table has an impressive list of features.

- Simple, functional design keeps diners equally spaced and in their seats. Rugged, welded leg assemblies of 2.875"OD steel pipe bolt to top and seats with security fasteners.
- Stainless steel rectangular top and 12" round seats are fabricated from 11 gauge Type 304 stainless steel. Indestructible and easy to clean and sanitize.
- Wheelchair access can be created by unbolting and removing end seat(s). 32" table height meets ADA requirements.
- Hidden floor mounting brackets, inside the standpipes, give the user the option of bolting the table to the floor.
- Leg assemblies are powder coated in standard colors.
- Table can be purchased KD (Knocked Down) for a reduced price. Assembly of seat assemblies and top required.

 Example: ISDT-5058-SS-BL

Designed for the correctional setting, this four station dining table also has an impressive list of features.

- Simple, functional design keeps diners equally spaced and in their seats. Rugged, welded leg assemblies of 2.875"OD steel pipe bolt to top and seats with security fasteners.
- Stainless steel octagonal top and 12" round seats are fabricated from 11 gauge Type 304 stainless steel. Indestructible and easy to clean and sanitize.
- Hidden floor mounting brackets, inside the standpipes, give the user the option of bolting the table to the floor.
- When bolted to the floor, wheelchair access can be created by unbolting and removing one seat assembly. 32" table height meets ADA requirements.
- Leg assemblies are powder coated in standard colors.

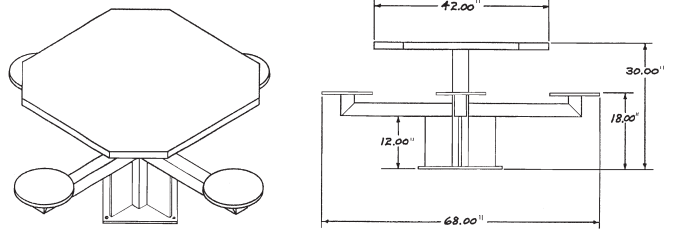

ISDT-4040-SS-XX

This four station dining table's simple design meets the requirements of the correctional setting.

- Simple pedestal design keeps diners equally spaced and in their seats. Fabricated from square tubing and steel plate, this one piece welded assembly must be bolted to the floor. Stainless steel top and seats bolt on with security fasteners.
- Stainless steel square top, with corners trimmed, and 12" round seats are fabricated from 11 gauge Type 304 stainless steel. Indestructible and easy to clean and sanitize.
- Pedestal must be anchored to the floor.  
(Floor anchors are not included)
- Pedestal assemblies are powder coated in standard colors.

Example: IPDT-4242-SS-BL

IPT-4646-SS-BL

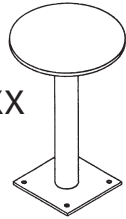

This eight person table is designed to be used indoors or outside. Freestanding, but too heavy to move alone, this table works well when some flexibility is required.

- Fabricated from 2.375"OD steel pipe and plate steel, this table is an all bolted construction allowing for disassembly, transport and storage. Security fasteners are used throughout.
- Stainless steel square top and bench seats are fabricated from 11 gauge Type 304 stainless steel. Bolted on from the bottom, they are indestructible and easy to clean and sanitize.
- This table may be anchored to the floor.  
(Floor anchors are not included)
- Leg assemblies are powder coated in standard colors.
- This table may be purchased with a laminate top for interior use only. Check with a sales person for pricing.
